## **DETAILED ACTION**

### ***Specification***

1. The entire disclosure, i.e., specification, abstract and claims, is replete with grammatical and idiomatic errors too numerous to mention specifically. The entire disclosure should be revised carefully. For example, improper use of commas and semicolons in the claim, etc.

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In this case, the abstract should be formatted to a single paragraph.

### ***Claim Objections***

3. Claims 7 and 8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 5. See MPEP § 608.01(n). Accordingly, the claims 7 and 8 have not been further treated on the merits.

4. Claims 1-5 objected to because of the following informalities:

a. Claim 1, lines 8 and 11; claim 3, line 2; claim 5, line 2 and 3; "the cases" should be --the two cases-- for antecedent purposes;

Art Unit: 2841

- b. Claim 2, line 3: "the hole" lacks antecedent basis;
- c. Claim 3, line 2; claim 4, lines 1-2; the channels" lacks antecedent basis; and
- d. Claim 5, line 4: "the bar" lacks antecedent basis.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

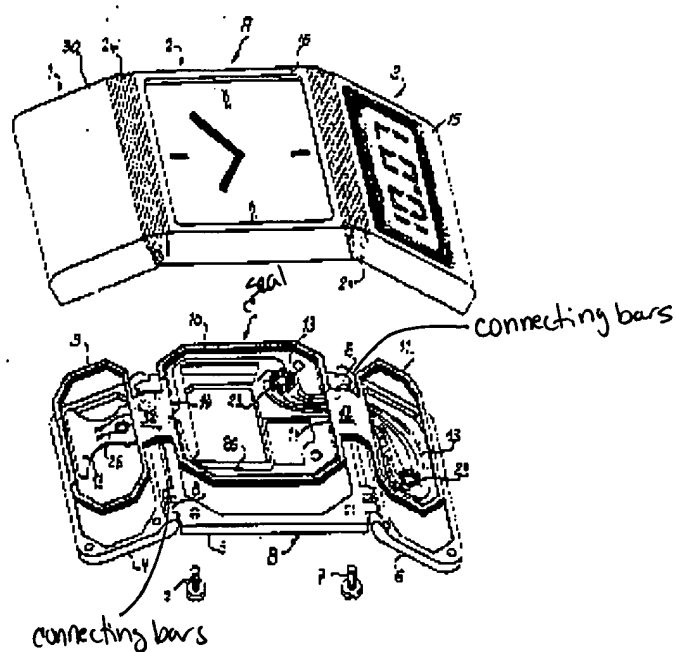

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4,412,751 to Jeannet et al. [herein after Jeannet].

Jeannet discloses jointed electronic watch including two juxtaposed cases (2,3), back covers (4, 5 and 6), crystals 19 and 20, flexible printed circuit board (13), hinges/connecting means (8), wherein the connecting means are formed of two connecting bars (see figure below) arranged on either side of the case which include internal tunnels/channels (14), electrical conductors (26), two holes arranged on the top of case (3) and two holes arranged parallel on the top of case (2), wherein the holes are fitted via tunnels with a moisture blocking seal comprising three parts (9, 10 and 11), wherein the tunnels open out into the two cases being sealed in a watertight manner, and the seal, e.g. rubber or any suitable plastic, taught being manufactured utilizing overmolding onto a network of the conductors (26) forming a grid with the seal.

Art Unit: 2841

***Allowable Subject Matter***

7. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
